How temp to perm can save your budget

Hiring the wrong person is expensive (anywhere from 50 to 400% of the annual salary!)—and interviews alone don't prevent it.

- • Do they have the skills to succeed?
- • Are they a fit for the team?
- • Are they motivated to do the job you need?
- • Can they adapt to changing conditions?

With a temp-to-hire approach, you can "try before you buy," validating skills, cultural fit, adaptability and accountability over a few months before making a long-term commitment.
